# BIOINFORMATICS MEETS DRUG DESIGN

**6 WEEKS** OF CUTTING-EDGE CADD  
INTERNSHIP

## Welcome to Our Program

At Dr.Omics Labs, we're delighted to offer you an extraordinary journey into the world of Industrial Bioinformatics and Computer-Aided Drug Designing. Join us and make a significant impact on the future of drug discovery and bioinformatics research.

### *About us*

Dr.Omics Labs is a leading institution dedicated to advancing bioinformatics, genomics, and proteomics research. Their Industrial Bioinformatics Long-term Internship program provides a combination of coursework and hands-on project experience to equip individuals with the necessary skills and knowledge to excel in the field.

### Key Program Features

- Comprehensive coursework in CADD techniques.
  - Hands-on experience with cutting-edge software and tools.
  - HR sessions to get you ready for interviews.
-

# Coursework Overview

1. Machine Learning in Drug Designing
2. HR Session (5 Days)

# MACHINE LEARNING IN DRUG DESIGN

- **Introduction to Machine Learning**
  - Basics of machine learning
  - Supervised, unsupervised, and reinforcement learning
  - Hands-on: Learn the basics with the scikit-learn library in Python.
- **Data Preprocessing for Drug Design**
  - Data cleaning and feature selection
  - Handling molecular data
  - Hands-on: Use Pandas and NumPy for data preprocessing.
- **Machine Learning Models for Drug Design**
  - Regression and classification algorithms
  - Deep learning in drug discovery
  - Hands-on: Implement machine learning models using scikit-learn and TensorFlow/Keras.
- **Applications of Machine Learning in Drug Design**
  - Predicting drug-target interactions
  - QSAR modeling
  - Hands-on: Apply machine learning to real datasets with RDKit and ChEMinformatics.
- **Drug Optimization and Lead Identification**
  - Structure-activity relationship (SAR) analysis
  - De novo drug design using ML
  - Hands-on: Use RDKit for SAR analysis and explore de novo design tools

## *Program Structure*

- **Duration: 6 Weeks**

## **Gain expertise in CADD techniques**

- **6 Weeks of In-Depth Learning**
    - **Data Mining and Analysis:** Extract valuable insights from biological datasets.
    - **Molecular Modeling:** Utilize advanced techniques in computational drug design.
    - **Collaboration:** Work in multidisciplinary teams, fostering effective communication skills.
  - **HR Session:** To assess your communication skills, teamwork, and fit with the company culture.
-

## FREQUENTLY ASKED QUESTIONS

**Q: Are these courses suitable for those new to the field without prior experience?**

A: Yes, our courses are designed to cater to beginners with no prior experience in the field. We provide foundational content suitable for all skill levels.

**Q: Will I receive a certification upon completing the course?**

A: Absolutely, a digital certificate will be awarded upon course completion. You'll receive this certificate via email.

**Q: Do the courses include practical projects and research opportunities?**

A: Certainly, our courses incorporate practical projects and research opportunities to ensure hands-on learning and the practical application of acquired knowledge.

**Q: Can I access class recordings if I miss a class?**

A: Yes, class recordings are available. We'll send you the recording link via email if you miss a class, typically on the day following the live session.

**Q: Can I continue to access course materials and resources after finishing the course?**

A: Absolutely, you'll retain access to course materials and resources even after completing the course. These materials will be shared with you via email or WhatsApp.

---

## **TERMS AND CONDITIONS**

- Maintaining Discipline during the Tenure.
- It is mandatory to maintain 85% attendance for all students.
- Students must maintain an average 'A2' grade throughout their training period.
